SOFTWARE ENGINEER

PERSONAL PROFILE

I am a computer science and full stack web developer bootcamp graduate whose studies were focused on web design and development. I'm seeking to apply my skills on real-world projects and deepen my understanding of software and web development.

PROJECT EXPERIENCE

GITMATCH

Matching APP for developers to collaborate with other developers

- JavaScript and React built application with query language API
- Utilized React and React-Bootstrap for front-end UI/UX to style components of pages
- Used React DOM Router to render pages and its components
- Produced and populated components with GraphQL and MongoDB which fetches data from GitHub API
- Made use of JavaScript Promises to associate handlers with an asynchronous fetch from our API's

FEED ME

Restaurant Randomizer APP

- Basic HTML CSS styling to create the Front End
- Used JavaScript to fetch data and post fetched data on the page
- GooglePlaces API to fetch users location
- Yelp API to fetch restaurants in users location that connects with GooglePlaces API
- Utilized Heroku to bypass CORS since this application is all FrontEnd client side

SOCIAL NETWORK API

API for social network web application where users can share/react to thoughts and create friends

- Database built and structured with MongoDB with Mongoose ODM
- Used ExpressJS to provide server side logic routing
- Integrated Insomnia/Postman to test queries and mutations with database
